

Freedom to Create

Steni gives architects extensive freedom in façade design – in color, shape, format and surface. With a broad range of expressions, the façade can be adapted to site, function and identity.

Design freedom is not only about aesthetics – it is about realizing architectural ideas in ways that work in practice – from early concept to completed construction.

- Wide range of colors, surfaces and gloss levels
- Options for graphic patterns and custom print
- Flexible formats and corner solutions
- Developed in collaboration with architects and industry experts
- BIM modules for fast visualization

One Technical Solution. Multiple Expressions.

All Steni façade panels share the same core. This allows Colour, Nature and Vision to be combined within the same project – without changing the underlying system or detailing.

The result is greater flexibility, simplified design and engineering, and seamless transitions between expressions.

- Technical Advantages:**
- 60-year functional warranty
 - Resistant to moisture, freeze-thaw cycles and impact
 - UV-stable colors and gloss levels
 - Low maintenance requirements

Steni projects

- Scan to see Steni façades in real projects.
- See how others have used it.
- Explore built references worldwide.

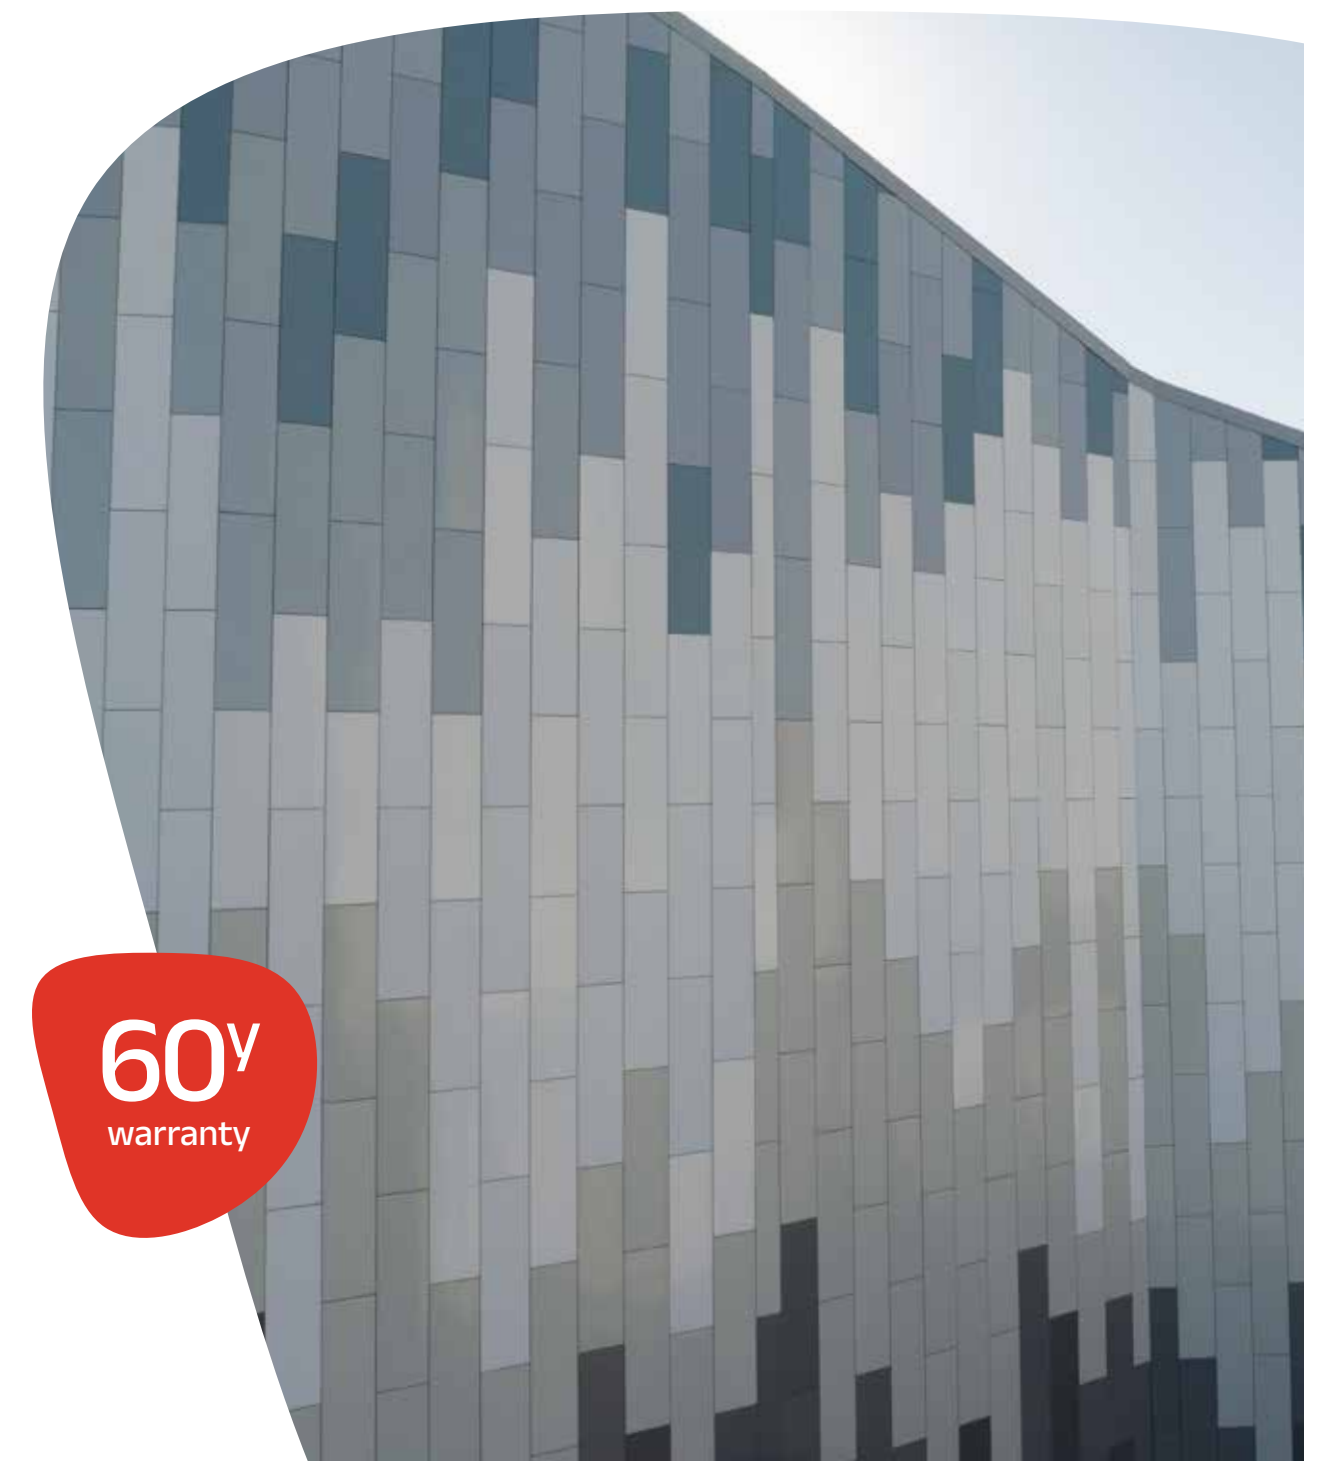

From Palette to BIM

Browse colors and reference projects, test façade expressions in 3D, and visualize solutions realistically – backed by documentation you can trust.

Enduring Façade Expressions

Façade solutions with design freedom – documented quality – and long service life.

warranty

More Than a Façade Panel

Steni has developed and manufactured façade panels since 1965. Our solutions combine architectural freedom with high technical performance – and long-term durability. Today, Steni façades are installed on residential, educational, commercial, and public buildings worldwide.

All Steni façade panels are based on a fiberglass-reinforced polymer composite with a core of crushed natural stone. This material composition provides high strength – low maintenance requirements – and stable long-term performance.

- Facts**
- Established in 1965
 - Designed and produced in Norway
 - More than 538,000,000 sq ft installed globally

Design Freedom in Color, Form and Surface

Steni is developed with a focus on efficient design processes – and reliable execution. A standardized core – prefabricated solutions – and flexible formats provide high predictability during construction.

Steni Colour
Smooth and robust surface. Standard and custom colors (NCS/RAL) – three gloss levels.

Steni Nature
Surface of crushed natural stone or recycled glass. Robust, tactile and natural appearance.

Steni Vision
Printed surface with virtually unlimited visual possibilities: graphics, photography, patterns or illustrations.

Design generator

- Scan to test façade expressions in 3D.
- Try finishes on a building model.
- Visualize it realistically – before you commit.

Downloads

- Scan for technical documentation.
- Download specs, EPDs, and product data.
- Everything you need in one place.
